

Part Number: **TC400RLP102**
Description: **1 RU, 5 RING CABLE MANAGEMENT
PANEL FOR A 19" MOUNTING**

Document name: **PGTC400RLP102**
Issue/Version No: **2.1**
Date: **23/08/2018**
Page: **1 of 1**

Use / Application:

The 1RU, 5 ring cable management panel is suitable to guide and locate either copper or optical fibre patch cords going to rack mounted equipment. Cable clips have a smooth internal radius, an easy opening action and greater depth allowing for greater MBR to accommodate Ø2mm OD optical fibre patch cords. Use of these panels provide enhanced cord management allowing for maximum air flow to active components within the rack.

The panel is also suitable to guide copper patch cords on structured cabling cross connect racks. It's increased length cable clips (80mm internal) allow for greater capacity and a larger bending radius from the connectors to the horizontal transition of the patch cord.

The panel fits 19" rack mounting. Extension brackets for conversion to 21" mounting are available separately (p/n TC1790-11BKIT). If required, hook and loop style ties can be used for fine management between cable clips.

Benefits & Features:

- Suitable for copper or fibre cabling infrastructure
- High capacity
- Greater depth to accommodate MBR requirements
- Fits standard 19" rack (21" optional)
- Mounting hardware supplied

Technical Attributes:

Dimensions	483mm (W) x 44.5mm (H) x105mm (D)
Weight	418 g
Materials	Mild steel
Colour	Powdercoat black
